Evolution of the preferred WHO recommendations for **initial** ART over the years

	2006	2010	2013	2016	2018	2019	2021	2025
NRTI backbone	d4T or AZT or ABC or TDF + 3TC or FTC		ABC or TDF + 3TC or FTC					DTG-based regimens preferred for all populations with a non-thymidine analog backbone (ABC or TDF)
Anchor drug	NVP or EFV		EFV or LPV/r					

Progression towards simplified and less toxic regimens

Preferred 2nd Line Anchor Drugs

PIs (LPV/r or ATV/r)

Preferred 2nd Line Anchor Drugs

Those failing PI or TLE – DTG

Those failing DTG – DRV/r
